

NEXT GENERATION MICROFILTRATION MEMBRANES FOR BEER FILTRATION

CASE STUDY

Agent for:

nx filtration

THE CLIENT'S NEEDS

Beer membrane filtration is gaining momentum as the best alternative for traditional filtration with diatomaceous earth due to its better yeast cell retention, taste stability, shelf life, and ease of use characteristics.

OUR SOLUTION

We applied our next generation hollow fiber microfiltration beer membranes both as replacement modules for existing installations as well as in newly developed systems with customer specific developed modules.

With our state-of-the-art hollow fiber beer filtration membranes we are the only independent supplier globally.
